SUMMARY

MCA Final Year Student with a strong technical foundation in Python, SQL, and Machine Learning. Hands-on experience in building real-time computer vision projects and conversational AI solutions through internship work. Eager to leverage data manipulation, querying, and analytical skills to step into an entry-level Data Analyst role and solve practical business problems.

TECHNICAL SKILLS

Database & Querying: SQL

Programming Languages: Python

Machine Learning: Computer Vision, Object Detection ,Basic ML Algorithms

Tools: MS Excel, MS Word, GitHub, Jupyter Notebook, Google Colab, Visual Studio Code

PROJECTS

Automatic Helmet & License Plate Detection System (*Python, ML, OpenCV*)

Developed a Machine Learning-based computer vision model to detect two-wheeler riders without helmets and extract license plate details automatically.

Processed video feeds in real-time using Python and OpenCV for accurate object detection.

Handled data collection, image pre-processing, and model training to improve detection accuracy.

AI Helpdesk / Movie Dialogue Chatbot (*Python, NLP, Seq2Seq, TensorFlow/Keras*)

Built a conversational AI chatbot that generates human-like responses based on movie dialogues using Deep Learning and Natural Language Processing (NLP).

Trained a Sequence-to-Sequence (Seq2Seq) Encoder-Decoder model on the Cornell Movie-Dialogs Corpus dataset.

Performed text pre-processing, including tokenization, padding, removing special characters, and vectorization for clean dataset preparation.

Handled sequence prediction to deliver context-aware and natural dialogue interactions.

EDUCATION

Master of Computer Applications – *3rd Semester (University: GTU)*

Anand Institute Of Management And Information Science| *8.45 CGPA* | 2025 - 2027

Bachelor of Computer Applications

Dharmsinh Desai University | *64.66 %* | May 2025

KEY CERTIFICATIONS & ACHIEVEMENTS

AI & Machine Learning Internship Certification :- Persevox Education Consultancy LLP.

College Hackathon Participant: Collaborated in a team to design and develop a prototype solution for a real-world problem.
